

STROKE PREVENTION in AF

GENERALLY → **NOAC (cost not issue) > WARFARIN (if cost is issue) > ASA (rarely)**

STABLE CAD → **PRIORITIZE STROKE PREVENTION**
• Warfarin (≈ NOAC) ≈ ASA in preventing coronary events
• Replace ASA w/ warfarin for stroke and CV event prevention

POST ACS → **NO PCI: OAC + clopidogrel x 12 m → OAC alone**
PCI: OAC + DAPT x 3-6 m → OAC + clop thru 12 m → OAC alone

PRIOR GI BLEED → **RESUME OAC ASAP (7 d)**

PRIOR ICH → **Resuming OAC → recurrent ICH**

LOW GFR → **GFR > 30 : normal therapy; GFR 15-30: WARFARIN**
